POWERBUILDER® 10.0

with Unicode support

Open IDE powers RAD (Rapid Application Development) with support for XML, JSP, EJB, .NET and Web Services

Introducing PowerBuilder 10.0, Sybase's market-leading RAD tool, with features that enable you to simplify and accelerate the creation of enterprise class, data-driven applications.

PowerBuilder 10.0 provides a higher level of developer productivity in heterogeneous computing environments with support for J2EE™ and Microsoft® .NET through tight integration of design, modelling, development and deployment.

PowerBuilder Key Features

- Unicode support
- DataWindow .NET
- ADO.NET database interface
- XML Web DataWindow
- UDDI Browsing
- PowerDesigner® Plug-in for Object Modelling
